Section: Narratives - Needs Assessment

Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the <u>Return on Investment of Afterschool Programs in</u> <u>Pennsylvania</u> study determined that for every dollar invested in after- school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency (Link to PSAYDN.org).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three- part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found Link to Accelerated Learning Toolkit.

Needs Assessment: In this section, LEAs are asked to describe the impact of the pandemic on their students, examine disproportionate impacts on specific student groups, and highlight the LEA's promising practices in supporting students' needs since March 2020.

Indicators of Impact

1. Describe how the LEA identified students for inclusion in after-school programming. Include a brief description of the indicators used in the decision-making process.

West Allegheny utilized multiple factors of student data to determine the list of students who were invited to participate in the Learning Enrichment Afterschool Program. Principals worked with teachers to gather student data including, but not limited to the following: Acadience Benchmarks, Study Island Benchmarks in reading and math, grades, attendance, prior participation in summer school, and teacher recommendation. Students identified for participation included students with disabilities and students with low income families. Principals at each school then made outreach to parents for recruitment. The goal was to facilitate after school learning in smaller groups than what occurs during the school day. Therefore, the district aimed to maintain a ten to one ratio between staff and students during after school.

Section: Narratives - After-school Program

After-school Program Questions: In this section, LEAs are asked to describe the activities they have designed to provide after- school programming for their students.

2. Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group Area of Focus		Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts	
Children from Low- Income Families	Academic Growth	85	Student benchmark scores will be used to compare beginning of the year, to middle and end of year scores in Acadience and Study Island.	

Describe the evidence-based resources that will be used to support student growth during the after- school program.

During the after school program, teachers will utilize district resources, inclusive of core curriculum (Investigations 3 and Journey's) and supplemental materials/ programs (Heggerty, Reading Horizon, Study-Island) to provide small group instruction to students. The topics of focus for instruction will be identified by the comprehensive assessment system that students take part in during the school day. Through analysis of benchmark scores, end of unit assessments, and teacher on-going formative assessment specific student needs will be identified and additional instruction will be targeted to support student needs. Additional word building materials have been identified by the district to support students with the manipulation of letters and sounds in building early literacy skills.

4. Describe the staff that will provide the after- school program (i.e., Internal staff or outside resources).

Number of Staff Members	of Staff Members Internal/Outside Provider		
12	Internal	District teachers with content knowledge at each grade level were selected for participation	

Number of Staff Members	Internal/Outside Provider	Role
		based on grade level needs at each school.

 \checkmark

a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.

\checkmark

- b. The LEA assures it understands it is responsible to ensure that all after-school program staff hold the appropriate certifications for the program that is being delivered.
- 5. How will the LEA assess the success of the after-school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Student Benchmark Assessments	Three times per year	Each student will demonstrate growth toward proficiency by the third administration. In addition, the rate of improvement will be consistently above minimal.

6. How will the LEA engage families in the after-school program?

The after school program will be structured in two sessions. During each session, parents will receive communication describing the program and inviting their child to participate. Throughout the program, parents will receive information regarding their child's progress in the form of anecdotal notes and assessment scores. Students will take home activities that they learn how to use in the after school program for additional practice/use at home with parents.
